Problem – Solution Fit Template

Date	15 Febuary 2025
Team ID	GACSE-114
Project Name	FitBuddy: AI Fitness Plan Generator Using Gemini Model
Maximum Marks	2 Marks

Problem–Solution Fit Canvas Content

1. Customer Insights & Constraints

Understanding the target audience and the barriers they face in achieving their health goals.

- **Customer Segments (CS):** Focuses on fitness beginners, college students seeking affordable advice, busy professionals, and individuals aiming for weight loss or personalized plans.
- **Customer Constraints (CC):** Key obstacles include a lack of time for research, information overload online, high costs of professional trainers, and difficulty maintaining consistency.
- **Emotions (EM) - Before:** Users typically feel confused about where to start, frustrated by slow progress, and uncertain about their specific diet and workout needs.

---

2. Problem Analysis

Identifying the "Jobs-To-Be-Done" and the root causes of fitness failure.

- **Jobs-To-Be-Done (JB):** Users need to find workout plans suited to their body type, receive personalized diet advice, track progress, and understand their daily calorie requirements.

- **Problem Root Cause (RC):** The underlying issue is a lack of personalized guidance; most people rely on generic plans that do not account for their specific lifestyle or nutrition needs.
- **Current Behaviour (BE):** Many currently resort to searching tips on YouTube, following influencers without personalized advice, or frequently changing diets without consistency.

---

3. The FitBuddy AI Solution

How the project addresses the identified problems through technology.

- **The Core Solution (SL):** FitBuddy AI is an AI-powered assistant that generates custom workout and diet plans using user data like age, weight, and activity level.
- **Key Features:**
    - **Personalized Planning:** AI-generated workout and diet plans based on user preferences.
    - **Health Analytics:** Integrated BMI and TDEE calculations.
    - **Visual Progress:** A 30-day weight projection chart to help users visualize their journey.
    - **Interactive Support:** An AI chatbot available for real-time fitness guidance.

---

4. Market Fit & Impact

The triggers that drive adoption and the expected outcome for the user.

- **Triggers (TR):** Users are often motivated by a desire to lose weight, health issues like low stamina, upcoming life events, or recommendations from peers and doctors.
- **Channels of Behaviour (CH):** The solution reaches users via web-based platforms, social media fitness communities, and mobile usage during daily routines.
- **Emotions (EM) - After:** Following use, customers should feel more confident, have a clearer understanding of nutrition, and experience visible fitness progress.

Problem—Solution Fit Canvas

1. CUSTOMER SEGMENTS CS

Who are your target customers?

2. CUSTOMER CONSTRAINTS (CC) CC

What limitations or obstacles do your comer face?

3. AVAILABLE SOLUTIONS (AS) AS

What existing solutions do your customers use?

4. JOBS-TO-BE-DONE / PROBLEMS JB

What jobs/tasks are your customers trying to get done?

What problems do they encounter?

5. PROBLEM ROOT CAUSE (RC) RC

What is the underlying cause of the problem?
Why do these problems exist?

6. BEHAVIOUR (BE) BE

How do your customers deal with problem?
What behaviors have they adopted?

7. TRIGGERS (TR) TR

What are the triggers that make your target customers seek solutions?
What are the events that motivate them to take action?

8. YOUR SOLUTION (SL) SL

Describe your FitBuddy AI solution.
How does your solution uniquely address their problems?
What are the core features and benefits?

9. CHANNELS OF BEHAVIOUR (CH) CH

Which channels will you use to reach your customers?
How do your target customers typically behave?

8. TRIGGERS (TR)

What are the triggers that make your target customers seek solutions?
What are the events that motivate them to take action?

10. YOUR SOLUTION (EL) EM

How do customers feel before using FitBuddy AI?

How should they feel after using FitBuddy AI?

How should they feel after using FitBuddy AI?
